

2013/14

ShooterKing®

A woman with long blonde hair, wearing a brown jacket and a brown satchel, stands by a wooden fence. She is holding a small glass in her right hand. To her right, the arm and hand of another person wearing a plaid shirt and a brown vest are visible, resting on the fence. The background shows a green field and trees with yellow autumn leaves.

ShooterKing®

A man and a woman are walking on a paved path in a park during autumn. The man is on the left, wearing a brown jacket and holding a shotgun. The woman is on the right, wearing a brown jacket and holding a leash for a black dog. A white and brown dog is also walking on the path. The background is filled with trees with yellow leaves. A red banner is overlaid on the left side of the image.

## Fabrics

## SUPER CANVAS®

Super Canvas® is a high-tech Bee Waxed fabric which is constructed of 65% Polyester and 35% Cotton.

It is highly:

- windproof
- water resistant, fast drying
- durable
- light in weight
- soft and quiet

### Windproof, Water-repellent and Breathability

High-density construction and Bee Wax attribute SUPER CANVAS completely windproof and water repellent with maximum of breathability. It offers the best solution to comfort under various weather conditions.

### Durable

STR test reports that the tensile strength of SUPER CANVAS reaches the maximum of 1,159 Newton. It is durable, quieter and lighter in weight.

### Anti-insect

To impart this feature, SUPER CANVAS is given an anti insect finish on textiles material.

SHOOTTEX® membrane is engineered for sweat management to keep your body dry and comfortable at all times with extreme breathability, durably waterproof and windproof.

It has a 10,000mm waterproof level and 10,000g breathability rating.

### What do the rating numbers actually mean?

The first is in millimeters (mm) and is a measure of how waterproof a fabric is. In this case of a 10,000mm fabric, if you put a square tube with inner dimensions of 1" x 1" over a piece of SHOOTTEX® membrane, you could fill it with water to a height of 10,000 mm (32.8 feet) before water would begin to leak through.

The second number is a measure of how breathable the fabric is, and is expressed in terms of how many grams (g) of water vapor can pass through a square meter (m2) of SHOOTTEX® membrane from the inside to the outside in a 24 hour period.

## SUPER CANVAS+

Super Canvas Plus is a high-tech Bee Waxed fabric which is constructed of 65% Polyester and 35% Cotton plus Mossy Oak New Break Up.

Live Skin is a soft shell fabric which is made of 60% Polyamide and 40% Polyester blended yarns.

It is light in weight but extremely durable. This double tones fabric is exclusively combined with forests and mountains.

Last but not least, Live Skin fabric is:

- soundless
- dirty resistant
- water repellent
- UV protective

The 100% Polyester suede is used for the shoulder patch and pocket cover. It is soft, light in weight and easy to care. SUEDE never shrinks after washing. It has the Buffalo leather look, but stronger and more durable.

CORDURA is stylish durable and lightweight strength. Resistant to tears, scuffs and abrasions. Designed for Living, Built for last.
